

Warm Weather Comfort "ICED" "SALADA" TEA

So easily made and so delightfully refreshing. Your grocer sells Salada in sealed metal packets only.

Topics of the Home and Household.

To drive a nail into a plastered wall first dip the nail into hot water.

Open all the cellar windows on a nice clear sunny day. Give the cellar a thorough airing.

Try bread and milk for luncheon on the next hot day and note the increased enthusiasm you'll feel for the afternoon's work—the feeling of physical and mental alertness that comes to those who eat wisely.

When olive oil is used at the table it should be put in dark colored bottles and removed to a cool dark place immediately after the meal. It is injured by being kept in the light.

Currant Jams and Jellies.

Currant Jam—Wash and pick stems from 1 quart of currants, add 3 cups of sugar and let stand over night. In the morning bring to a boiling point, stirring almost continually until done. Test as for jelly by taking a little on a cold saucer. If it congeals it is ready for glasses. Finish in the sunshine. Seal as for jelly. Equal parts of raspberries and currants make a nice combination, and in red raspberry jam 1/2 cup of currant juice to each quart of berries adds much to the flavor of the jam.

Uncooked Currant and Raspberry Jam—This is my recipe for uncooked raspberry and currant jam, and it is delicious. Take equal parts berries and sugar. Thoroughly wash fruit to a smooth pulp, add sugar and stir until every particle is dissolved, as that is the secret of its keeping. Pour in glasses and set uncovered for a week or so, or until sugar coating is formed on top, when it may be covered like any jelly or jam and set away in a cool dry place. For jelly the juice must be strained.

Currant Jelly—Pick over currants. It is not necessary to sting them. Wash and put on stove with very little water. Boil until tender. If you wish clear jelly strain through a jelly bag. It may be strained in a wire strainer, but the jelly is not quite so clear but tastes good. Measure juice. Allow 1 cup of sugar to 1 cup of juice. Let come to a boil and from the time it commences to boil count 20 minutes. Do not stir after it comes to a boil or boil too fast. Just keep it boiling. Skim off after taking from the fire. Pour into jelly glasses. When set cover with paraffin. Select bright day for making jelly.

Danish Recipe for Currant Jelly—Take currants that are barely ripe and do not pick them just after the rain, when the juice is thin. Do not stew them or mash them, but look them over carefully and crush them in a crock with a wooden potato masher. Put them in a bag and hang them up and let them drain all night. In the morning measure the juice and take just as much sugar with the addition of one extra 1/4 pint at the end. Put this in the oven to heat. Put the juice on the fire and boil it 20 minutes, skimming it occasionally, then put in the hot sugar and stir until it is dissolved. Let it boil up hard just once and take from the fire, immediately, for the jelly has come. Longer boiling will prevent its ever setting. Pour it into glasses and put it in the sunshine for two days, then cover with paraffin and put away. This is perfectly clear and of a fine flavor.

Raspberry and Currant Jelly—Raspberries as a rule are very hard to handle in making jelly, but with currants the case is quite the reverse. Use half of each. Crush the fruit together, add as little water as possible, cook until the juices are free, drain through a jelly bag. Heat again after measuring. When at boiling point add sugar measure for measure. Cook until it tests to a jelly. Do this by dropping it on a butter plate and cooling very quickly. It's splendid jelly

and never fails to "jell."—Boston Globe.

Thoughts Make or Mar Beauty.

Something more than just meticulous care of the face and application of creams and lotions, facial massages, thick eyelashes and arched brows enters into the acquisition of beauty—and that is care of the thoughts.

No matter how lovely the texture of the skin, how brilliant the lustre of the eyes, nor how deeply carmine the lips, if expression is lacking, or if it is unpleasant, there is no beauty, says the Springfield Republican.

One should think kindly. There should be intelligence and character so legibly written upon the countenance that the observer reads these qualities and feels a resultant admiration. Sanity in all things; no over-indulgence in eating, recreation or social activities, is essential. If one can meet these requirements, and take her days in moderation, beauty will be much more efficacious.

Wash the face with soap and water at least once every day. Give the hair at least 50 strokes with a brush every night.

Wear shoes that fit the foot perfectly for tight shoes impede circulation and bring wrinkles to the face.

Be properly fitted to a corset that upholds the abdomen and supports the natural figure.

Get around the water wagon and drink at least eight glasses of water every 24 hours.

Do not worry, for worry begets wrinkles.

Get at least eight hours of sleep every day after you are 30 years of age. Ten is better.

Feed the skin with cold cream and healing lotions as you feed the body with food.

Take some time for play every day. Be well groomed at all times. There is no excuse for a slovenly woman.

Stains upon the hands should be removed at once, instead of waiting until they have settled into the skin. Always have a bottle of peroxide handy, so that when any member of the family gets scratched or cut the wound may be cleaned with it. An excellent formula for this purpose is half peroxide and half water, with a few drops of ammonia added.

Dorothy Dexter.

One of the Family.

Tillie had been placed by her aunt in a situation as maid of all work in a family of three. At the end of the week the aunt dropped in to see how she was getting on.

"Do you like the work?" she asked.

"It's fair," said the little Tillie. "Are they making you feel at home?"

"Sometimes, they do, sometimes they don't."

"Now what do you mean by that?" demanded the aunt.

"Well," said Tillie, "they haven't asked me to go to church with them yet, but last night they went on with a grand quarrel they were having, all the three of them, with me taking the dishes off the table, just as if I had been one of the family."—Harper's Magazine.

Stopped His Sneering.

The candors of the brethren are illuminating. An American evangelist was engaged by a church for a week's special mission. On his arrival he went to see the minister. "What sort of church have you here?" he inquired.

"Well," replied the pastor, "I am afraid things are pretty bad. The people are worldly and careless, the congregations are small, there is no interest in missions, no one comes to a prayer meeting, dances and card parties go on all through the week, and the people are indifferent to the claims of religion."

"Well," sneered the evangelist. "If I had a church with members like that, I'd go out and hire a yellow dog to bite 'em."

"Yes," said the minister, "that's what we've done."—Christian Register.

Ailing.

"If Bibbles were to stay at home three nights in succession, what do you suppose Mrs. Bibbles would do?" "She'd send for a doctor, and be justified in doing so,"—Birmingham Age-Herald.

SUSPECT TELLS WIDE STORIES

When Questioned in Connection With Henry McMahon Case

CHARLES SNAGRAS
HELD IN IPSWICH

When Caught Giving Pennies to Boys and Girls

Ipswich, Mass., July 24.—Marshal Edward J. O'Leary of Salem, who is investigating the murder of 12-year-old Henry McMahon of Salem, whose body was found in a lot last week, came here early to-day to question further Charles Snagras, who was arrested last night on suspicion by Patrolman Herbert Whitter and Albert Langmaid. The officers said the man was giving pennies to several boys and girls.

When first questioned following his arrest, the man gave several names. Admitting that he had been in Salem at the time of the McMahon boy's murder, he later said that he had been in Lowell. Because of several discrepancies in the man's story he was held.

Boston, July 24.—Fear that their nephew, James M. Cox, 12 years old, who disappeared July 2, might have been the victim of a murder similar to that of Henry P. McMahon of Salem, was expressed to-day by Mr. and Mrs. J. W. Courtney of Dorchester. The boy had been making his home with them for some time.

The Courtneys reported that the lad left home for church but failed to return and that nothing had been seen or heard of him since.

The police throughout New England have been asked to search for the missing boy.

The Human Side of History.

Customs change with the years, and to attempt to impose the standards of to-day on the manner of life in past centuries is a childish and ignorant mistake. What Senator Watson of Georgia hoped to prove by his statement that George Washington traded a slave for a barrel of West Indian rum no one can say. Perhaps he had no further aim than to petrify public attention.

Certainly no grown man would endeavor to maintain that merely because George Washington did a certain thing which was considered proper in his day a repetition of that deed would be justified in the present age. Our first president drank his coffee out of a saucer, and in his mansion at Mount Vernon had not even the conveniences requisite to a modern tenement, but that proves nothing except that life has changed.

It is due to a recognition of the fact, as much as to any desire to conceal the weaknesses of our national heroes, that a strongly supported movement for the censorship of history books is being carried on. A committee of high school teachers in New York has recommended that several school books be re-written, replacing such facts as that Sam Adams was a smuggler with the hallowed myths of our fathers. In Current History magazine W. I. Lincoln Adams, president of the Sons of the American Revolution, makes a plea for a rigid censorship of what the children are taught concerning the acts and motives of American historical characters.

This, too, is a mistaken attitude, for in the course of time most Americans stumble on unflattering aspects of history in some such way as the senator from Georgia presents them, without interpretation, and themselves almost innocent of the notion that these great men were human, after all, and not divine.

In the interests of advancing civilization, neither patriotism nor institutions should be risked on a foundation that is hidden or false. It is a great truth to be remembered that the right of an age may become the privilege of another and the wrong of the next.—Omaha Bee.

Just After Dinner.

Dinner was over, the women had retired to the drawing room and the men, over their coffee and cigars, were talking of love. Suddenly the host exclaimed:

"Well, gentlemen, I tell you this, I have kissed the South Sea Island maiden, I have kissed the dainty Japanese maiden, I have kissed the girls of England, of Spain, and of France, but I tell you truthfully, to kiss my wife is best of all."

A young man across the table called out: "Your's right, there!"—Kansas City Star.

Unseasonable.

"When I was born nobody thought I should shovel snow."

"When were you born?"

"On the 10th of August."

"Well, who thinks about shoveling snow then?"—Munich Meppen-Dorfer Blaetter.

Art of Facial Expression.

"Dearest," he said, sighing, "it doesn't seem like the same old smile you used to give me."

"Oh, no, Jack," replied the sweet thing, "this is a new one. I have been studying at a school of dramatic art."—Florida Times-Union.

Improving Her Opportunity.

Hobby: I can't understand why you should always show such a mean disposition in the morning.

Wife: At what other time should I show it, may I ask? You're not here the rest of the day.—Kansas City Star.

That Tells.

The eyes may be the windows of the soul, but the mouth is the door that shows what kind of company it entertains.—Boston Transcript.

Goodrich announces. new tire prices —lowest cost mileage ever known

Effective July 20th, Goodrich established a revised price list that is a base line of tire value.

It gives the motorist the buying advantage of knowing that whatever size tire he selects is of the same quality—the Goodrich one-quality standard.

It gives him the longest mileage, the most satisfactory service and the highest quality his money can buy. Results will prove that it is impossible to buy tire mileage at lower cost.

Think of being able to buy

Silvertown Cords

at such prices as these:

SIZE	BASE LINE PRICE	SIZE	BASE LINE PRICE
30x3 1/2 CL.	\$13.50	34x4 S.B.	\$30.85
31x3.85"	15.95	32x4 1/2 "	37.70
30x3 1/2 S.B.	15.95	33x4 1/2 "	38.55
32x3 1/2 "	22.95	34x4 1/2 "	39.50
31x4 "	26.45	35x4 1/2 "	40.70
32x4 "	29.15	33x5 "	46.95
33x4 "	30.05	35x5 "	49.30

New Base Line prices are also effective on Goodrich Fabric Tires:

SIZE	BASE LINE PRICE	SIZE	BASE LINE PRICE
30x3 "55"	\$ 9.65	32x4 S.B. (Safety)	\$21.20
30x3 1/2 "	10.65	33x4 " "	22.35
32x3 1/2 S.B. (Safety)	16.30	34x4 " "	22.85

No extra charge for excise tax. This tax is paid by Goodrich

This revised price list affords the motorist as definite a guide to tire prices as Goodrich Tires are the definite standard of tire quality.

THE B. F. GOODRICH RUBBER COMPANY, Akron, Ohio

Practicing What We Teach —and Teaching What We Practice

BURDET COLLEGE has practiced and taught successful business methods since 1870. It is more than a school; it is a successful business institution, the largest of its kind in the world. Its management and faculty are business men and women as well as educators. Its graduates, numbering more than thirty thousand, have succeeded because they have been taught successful business methods.

COLLEGE GRADE COURSES: Business Administration, Accounting, Secretarial, Commercial, Normal, and Teacher Training.

SHORTER COURSES: Business, Shorthand, Combined, Civil Service, Dictating Machine, Calculating Machine, and Bookkeeping.

NIGHT SCHOOL: College grade and shorter courses same as in day sessions.

Under the direction of Business and Salesmanship for Business Men and Women in Touch at Burdett College.

SUNLIGHT CURE.

Chemical Effects of Sun's Rays Relief for a Number of Ills.

The rays of the sun work chemical changes in the blood of human beings and animals according to the evidence of a series of experiments which have been carried on at the College of Physicians and Surgeons, connected with Columbia university.

The effect of the sun in killing bacteria is well known and its beneficial effect on health also is well known, but it is said that the direct chemical effect of the sun on the blood has not been previously shown. Some portion of the ultra-violet rays, which produce photographic and other chemical effects are believed to pass through the skin, operating powerfully on the blood circulating in the capillaries.

The direct chemical action of the sun was established in the course of a study of sunlight on children afflicted with rickets. Exposure to the direct rays of the sun, it was reported invariably effected a cure. One of the conditions always found to be associated with rickets was a deficiency of inorganic phosphorus in the blood. Tests of the blood were made on the day young patients were exposed to the sunlight and it is argued either that the

treatment and on successive days until they were cured. Although the diet was not changed in any way, the tests showed a continual increase in inorganic phosphorus as the treatment proceeded. X-ray pictures proved that their blood's composition apparently corrected by sunlight, gradually repaired the rickety bones.

Rickets in a mild form is a common disease among children, especially in large cities. It affects children of well-to-do families as well as those of the poor and occurs on diets of the most expensive certified milk, as well as on poorer grades of milk. The evidence that it is caused by lack of sunlight has been confirmed by experiments on animals, which showed that it was regularly contracted by those kept in darkness. Other animals on the same diet, but exposed regularly to sunlight, did not contract disease.

As rickets is largely a seasonal disease appearing most frequently in winter and frequently disappearing in summer, its cause was associated partly with a deficiency of sunlight. It may occur, so far as known, on any diet although bad hygiene and bad diet are associated with it.

It had been supposed that rickets was caused by diet lacking in vitamins. As sunlight cures the disease without any change from the deficient diet, it is argued either that the

absence of the vitamins is not the true cause of the disease or that the sun has an effect equivalent in creating the missing vitamins in the blood.—New York Times.

Heaven Indeed.

Small boy—Mother, can God see everything?

Mother—Yes, dear.

Can he look through cloth and iron?

"Yes, dear. He can even do that."

"My gosh! Think of all the circus he must have seen for nothing!"—Los Angeles Times.

Gouraud's Oriental Cream

Unexpected.

It was a scorchingly, depressingly hot day, but the woman who crossed the street just ahead of the girl looked as though it was perfect. She evidently was the sort of woman whose ideas of behavior are stronger than her emotions and who feels that the street of all places, is not the spot to reveal one's real feelings.

She was quietly dressed, and yet the plain blue of her gown and hat did not deceive the girl for a moment into thinking that her costume was inexpensive. The little ruffs of lace about the neck were real, as was the short string of pearls; the very simplicity of her dress spoke Paris in every line.

And the girl straightened her own shoulders as she looked at the stranger. If this older woman could remain so poised and tranquil, despite the heat, she could, as well.

Then it happened—the unexpected, the unbelievable!

An ice wagon was drawn up at the curb, and as this exquisitely groomed woman reached it, she stepped to the street and mounted the step. Very delicately she reached out a small ringless hand, closed her fingers over a

piece of ice and without even cleaning it off, popped it into her mouth. And without the slightest suggestion that she had realized her conduct might have been perceived, she continued her quiet way up the street.—New York Globe.
